

Business Question and Visualization Report

Date	26 August 2026
Team ID	-
Project Name	Food Ordering Behaviour and Consumer Trends
Maximum Marks	5 Marks

Visualization development refers to the process of creating graphical representations of data to facilitate understanding, analysis, and decision-making. The goal is to transform complex datasets into visual formats that are easy to interpret, enabling users to gain insights and make informed decisions. Visualization development involves selecting appropriate visual elements, designing layouts, and using interactive features to enhance the user experience. This process is commonly associated with data visualization tools and platforms, and it plays a crucial role in business intelligence, analytics, and reporting.

Business Questions and Visualisation

The process involves defining specific business questions to guide the creation of meaningful and actionable visualizations in Tableau. Well-framed questions help in identifying key metrics, selecting relevant data, and building visualisation that provide insights.

- **1. Which age groups contribute the highest number of customers?**
- **Visualization:** Bar chart showing the distribution of customers across different age groups.
- **Screenshot of Visualization:**

2. Which meal type receives the highest number of orders?

Visualization: Bar chart comparing the total number of orders across different meal types such as breakfast, lunch, dinner, and snacks.

○ Screenshot of Visualization:

3. Which are the top 5 cities by order volume?

Visualization: Horizontal bar chart showing the top five cities based on total food order volume.

○ Screenshot of Visualization:

4. How does food ordering behaviour differ between weekdays and weekends?

Visualization: Bar chart comparing total orders on weekdays and weekends.

○ **Screenshot of Visualization:**

5. What is the distribution of customer mood across food orders?

Visualization: Bar chart showing the distribution of orders across different customer mood categories.
