

Dashboard Design

Date	26 August 2026
Team ID	-
Project Name	Food Ordering Behaviour and Consumer Trends
Maximum Marks	5 Marks

Creating an effective dashboard involves thoughtful design to ensure that the presented information is clear, relevant, and easily understandable for the intended audience. The Food Ordering Behaviour and Consumer Trends dashboard is designed in Tableau to provide an interactive and visually appealing analysis of customer ordering patterns.

Activity 1: Interactive and visually appealing dashboards

Creating interactive and visually appealing dashboards involves a combination of thoughtful design, effective use of visual elements, and the incorporation of interactive features. Here are some tips to help you design dashboards that are both visually appealing and engaging for users so take care of below points

- Clear and Intuitive Layout
- Use Appropriate Visualizations
- Colour and Theming
- Interactive Filters and Slicers
- Drill-Down Capabilities
- Responsive Design
- Custom Visuals and Icons ● Use of Infographics

- **Identified the most preferred cuisines**, helping understand customer food preferences and popular menu categories.
- **Identified the leading cities by order volume**, highlighting the strongest markets and locations with higher customer demand.
- **Analyzed customer age distribution**, helping identify the major customer segments using food-ordering services.
- **Determined popular meal types**, providing insights into customers' preferred ordering periods.
- **Compared weekday and weekend ordering behaviour**, revealing differences in customer ordering patterns.
- **Analyzed the impact of discounts on orders**, helping understand how promotional offers influence customer purchasing behaviour.
- **Analyzed customer mood and satisfaction patterns**, providing insights into the overall customer experience.

- **Compared cities and cuisines**, identifying differences in cuisine preferences across locations.
- **Examined average order value by hunger level**, helping understand the relationship between hunger and customer spending.
- **Developed an interactive Tableau dashboard and story**, combining multiple analyses into a single visual solution for easier interpretation and data-driven decision-making.
